# 2021 GARRISON AG SHOW WELCOME

The Garrison FFA is proud to present the 27th Annual McLean County Ag Show! 2020 was a CRAZY year and we are so thankful to still be able to continue with our show. The McLean County Ag Show is a great way for local businesses to come together. This year the Ag Show

will be held on February 3th in the Garrison High School Gymnasium. The Show will run from 9:00 a.m. to 3:00 p.m. Many Exhibitors will be featured at this Show. We will have door prizes provided our awesome exhibitors. Also, be sure to check out our wonderful students show-

casing their SAE projects. The Garrison FFA and Alumni Members are ecstatic for another great year, and look forward to seeing you at the show!

Taylor Johnson

## Coy Saylor

SAE PROJECT

This year I mostly baled hay and raked hay for a farmer west of Garrison. Some other jobs I had were building and fixing fences for cattle for the same farmer. I also changed rake and baler teeth. I rolled soybeans earlier this year for a farmer near Parshall.

## Blake Majeres

SAE PROJECT

During the summer my SAE consisted of a Diversified Crop Production placement, which is working for Majeres farms. In my free time after work I have a Forage Entrepreneurship operation. I make and sell the hay on shares with my brother and dad. He gets some for the steers and the rest is to sell. We recently just bought a newer baler and a different sickle mower to the fleet which helps us be more productive.

IT'S A WAY OF  
**LIFE**

Agriculture is more than a business. It's a way of life. From the food on our tables, to the clothes on our backs, we all depend on agriculture. We believe in agriculture. We invest in it. We've been making ag loans since the day we first opened our doors for business. Making things grow is what you do, and it's what we do too.

We all depend on agriculture. Around here, agriculture is the engine that makes our economy go. When something's good for agriculture, it's good for our community. We would like to take this opportunity to thank our area farmers and producers for all they do to make our area a better place to live. Thanks.

Making Things  
**grow**

## Abbigail Zeiszler

SAE PROJECT

My SAE is a paid placement in the kitchen at Camp of the Cross. This is a Food Service and Food Products and Processing Systems based SAE. In the kitchen I help with meal prep for future meals, make a meal plan for each week, make the meals, serve the food to campers and other staff, clean and sanitize all surfaces that food would be in contact with, do the dishes, help order the needed products for the week from the truck, deliver snacks to ACG or campfire, and practice proper food storage and health procedures. This past summer I was also the Kitchen Coordinator, so when the manager was gone I was in charge. I had to decide what needed to be done and when. It was a great growing experience! My favorite part of my SAE is coming up with ways to make the meals fun and more interesting for the campers. I also really enjoy interacting with the campers while serving. The summer of 2020 was my third year working in the kitchen.

## Carly Seidler

SAE PROJECT

My SAE project is working at Cenex. This is going to be my third year working here. I am a cashier at the front of the store. When I'm working we have a checklist of things to do for the day. That list consists of things like taking out the garbage inside and the ones at the pumps, cleaning the coffee, cappuccino, and pop machines, cleaning the bathrooms, sweeping and mopping, and much more. While working at the tills, we get a lot of questions. I try to help customers to the best of my ability. Things we do at the tills are helping people pay off their accounts in person or over the phone, people pre-paying or paying for fuel, charging things to peoples accounts, and to pay for their things they want to buy with cash or card. I enjoy this job, as I get to see many people in a day, some new and some of the usuals that come in. It's nice to meet new people daily and be able to have conversations with them and the people that usually come in daily.

## Taylor Johnson

SAE PROJECT

My SAE is a veterinary science placement. As a part of my high-school career I participate in a vocational agricultural co-op at the Garrison Veterinary Services. Work I assist with includes preparing kennels, cleaning, assisting in vaccinations, and lab procedures required by a vet clinic. This is my senior year and after high-school I plan to become a veterinary technician.

## Alison Betz

SAE PROJECT

My SAE is raising Nigerian Dwarf and Mini Nubian dairy goats. I currently own eight does and two bucks. I feed and water the goats daily and vaccinate and supplement them twice per year. In the fall and winter I breed the does and they kid in the winter and spring. Once the kids are two days old I start to bottle raise all of the kids and begin milking the does twice daily. I milk the does through the summer and early fall. In June and July I also take my goats to shows like the McLean County and State Fairs. My goal for this year is to expand my herd and to offer herd shares to interested locals.

### Equipment and support solutions: RDO does that.

## Averey Kerzmann

SAE PROJECT

This year I worked at Magnum Electric during the summer as an apprentice electrician. I did various tasks such as mounting outlet boxes, stripping and connecting wires, trench, mount and bend pipe, and installing sconce lights and outlets. It was brand new to me and was quite interesting to learn what electricians do especially on a commercial job site. I also helped my Dad on the farm again this year doing tasks like seeding, coulturing, rolling, combining, running grain cart, and trucking. While working out there I also helped replant trees behind my grandmother's house. To prevent the wind from blowing them over I wrapped cable around them and tied them off on a steel post. It was a fun and interesting year getting to learn new skills and work in different environments!

*We've protected farms for over 100 years.  
You can depend on us to provide quality  
protection and friendly, hometown service.*

## Colton Iglehart

SAE PROJECT

My SAE is a Beef Cattle Production Placement and Entrepreneurship. In my SAE I help around the ranch. I also have my own cows and help my dad. I make a lot of hay in the summer. To help around the farm, I seed, pick rock, and help get equipment ready to go to the field.

## Gavin Mautz

SAE PROJECT

My SAE project is working on my family farm and ranch. I own cows and help with the hay production and fencing. I also help with the farming. I stay busy coltering, rolling, chisel plowing and picking rock. I have worked here ever since I can remember.

## Josie Westman

SAE PROJECT

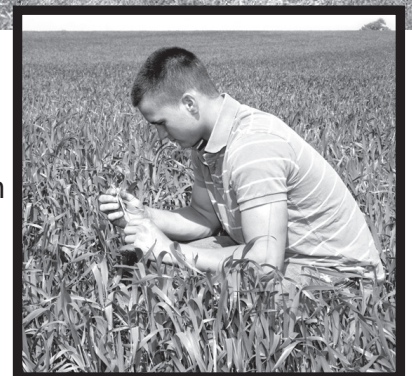

I have three SAE projects: poultry, beef, and goat production. I feed and take care of the chickens and goats, I make sure they have food and water every day. I trim hooves for the goats and make sure they're happy. I own one cow and I help take care of the cows also by feeding them and repairing the fence.

The  
**Right Advice**  
has never been more crucial

You can count on the Grain & Agronomy teams at CHS Garrison to help you with your marketing decisions and time your fertilizer purchase at a better price.

We'll help you maximize yields and profits with the right applications at the right time.

## Emma Kramber

SAE PROJECT

My SAE project is working at Hot Stuff. There I answer the phone, make pizzas, burgers, breadsticks, cheesy bread, egg rolls, subs along with many more things. I also do dishes, sweep and mop floors, and clean the fryer twice a week. I work anywhere from 12 hours a week to 20 hours a week during the school year. In the summer I can work anywhere from 24 hours a week to 32 hours. I have worked there for about a year and a half.

## Kadin Kolden

SAE PROJECT

This summer I completed my SAE, which was making and selling square bales. I made a few bales to keep in the barn over the winter, but I sold most of the bales. I cut, baled, transported, and sold about 100 bales this year, and plan to do more next year.

## Justis Klabunde

SAE PROJECT

My SAE project was driving grain cart for the family farm. I have to load on the go and unload in the truck. I have wanted to help with the family farm for a while now and this is the first step for me taking part in it. Next year I hope to learn to become more efficient at driving grain cart and hopefully learn to drive the combine.

## Mackenzie Fuller

SAE PROJECT

My SAE is Wildlife Management. With my SAE I help work on my dad's land. I help plant trees, corn, and food plots. Sometimes I help him spray the weeds too. I started in 2010 and I will keep working on it. We have planted over 2,000 trees on our land, and now have a great area to hunt. So far we have harvested over 80 deer in the past 10 years. We grow enough sweet corn to last us through the whole year. This past summer I won the Alexa Jo Young Scholarship for \$250 to use on my SAE project. With that money I bought and planted more trees, to give the wildlife a habitat.

## Madison Myers

SAE PROJECT

My SAE is Diversified Crop Production Placement. I help my dad on the family farm with various tasks such as rolling peas, working on equipment, and cleaning grain bins. I enjoy this SAE because I enjoy farming, and hope to farm in the future.

Farmers Security Bank has proudly served our farmers and ranchers since 1919. ## Libby Heger

SAE PROJECT

Libby's SAE is breeding, raising, and showing Boer goats. Libby focuses her time on animal nutrition, barn efficiency, and marketing Boer kids and yearlings. It is important to her to provide livestock to others that have strong genetics yet are affordable. She wants to provide opportunity for youth and younger show folk to experience the show ring. With this breed being a meat breed, Libby also keeps an eye on animal structure and muscle tone so that the meat product of the animal is of high quality. Libby has been working with her SAE for 3 years and involved in showing Boer goats for 8 years.

## Zach Seidler

SAE PROJECT

My SAE this year was working at the Fort Stevenson State Park. What I did was clean bathrooms and mow grass. After bathrooms we would do daily maintenance to our mowers like checking fluids, greasing, and filling fuel then go mow. I enjoyed working at the park and seeing all the people that enjoyed camping and fishing.

## Olivia Klein

SAE PROJECT

My SAE is Beef Production. I have 12 cows that I have raised and bred for 4 years. I sell the steers in the fall and depending on the number of heifers there is, I either hold them back to add to the herd later on or sell them along with the steers. Once the calves are weaned, they are brought to a different pasture and are fed a mixed feed until late November, then they are sold.
