More info: [WWW.NEWLIFEWEB.ORG](http://WWW.NEWLIFEWEB.ORG)

This little gadget costs about \$22 and is not bigger than a jug of distilled water. I fill the jug and allow the water to sit at room temperature and then fill the top tray after emptying the top tray. Rotating the trays is important to allow even water dispersal and keep out of sunlight until you want to green those sprouts up.

## Let it grow, let it grow, let it grow

By now, your gifts are wrapped, your dinner is planned, you may have already attended Christmas Eve services, and most certainly, your cookie-baking and candy-making are coming to a fast close.

Days have begun to lengthen at a much faster pace than they shortened. The cold is yet to come, but can spring be far behind?

I'm craving green. Typically, I start my transplants in February since I garden inside high tunnels and want to be prepared for a rapid increase in temperature come March. A girl can hope can't she?

In the meantime, I have tried indoor lettuce to no avail. I was considering microgreens this time of year, and then I remembered – you can grow sprouts.

Microgreens are grown in trays of soil. To harvest, you clip them off at the soil line leaving behind the root. It all must be recycled because the plants lose the ability to photosynthesize; the roots die and will not grow a second crop.

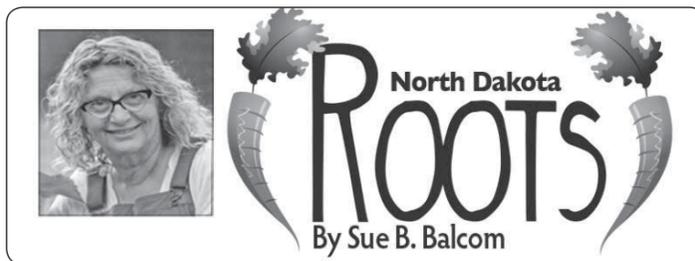

On the other hand, sprouts grow in moisture, and you can eat the entire sprout, root and all. They are more than a garnish. One of my favorite sandwiches is mung bean sprouts and peanut butter.

You can use them in any salad, sandwich, omelet, stir fry, wherever you would like a bit more nutrition. Yes, like microgreens, sprouts are a powerhouse of nutrients.

The choice of seeds for sprouts is long. You can sprout sunflower, alfalfa, bean, mustard, radish, even nasturtiums.

Something to keep in mind when purchasing seeds is always buying organic and untreated seeds. Also, do not buy roasted, cracked or prepared seeds. Some places that have a variety of sprouting seeds are Walmart  
www.johnnyseeds.com  
https://mountainroseherbs.com

Gurneys  
www.TrueLeafMarket.com

Amazon and maybe any of your local stores that sell gardening seeds and supplies.

There are several sprouting seeds, and it only takes from three to eight days, depending on the seed.

Grow Sprouts Instructions

1) Soak 1-2 tablespoons of sprouting seeds for at least eight hours in fresh, cool water in a wide mouth mason jar.

2) Drain and rinse the sprouts.

3) Repeat Step 2 for 3-5 days until your sprouts are ready to eat!

It doesn't get any simpler than that. You can use a screen cut to fit a Mason jar band or purchase a plastic lid made for sprouting. Or, use a rubber band and some

cheese cloth.

BE SURE AND RINSE THEM EVERY DAY

Once the sprouts are about one to three inches long, set them in the sun, so they turn a little green. Then, it's time to de-hull. Submerge the sprouts in some fresh cool water, then push the sprouts down with your hand, and the hulls will rise to the top of the water. Pour off the water and the hulls until most of the hulls are gone (you don't have to get all of them).

Method two requires a linen or hemp sprouting bag.

# BE PREPARED FOR SEVERE WINTER WEATHER

## Winter Weather Preparedness Week October 26-30

*As road conditions worsen, and with the added truck traffic on area roads, please use extreme caution when traveling.*

### Survival Kit For Winter Driving:

- Coffee can or other empty and clean food can
  - 60-inch length string (cut into 3 equal pieces - used to suspend can)
  - 3 large safety pins (tie string to safety pins and pin to car roof interior to suspend can over candle)
  - 1 candle 2" diameter (place on lid under suspended can for melting snow). Canned Sterno will also work to heat water.
  - 1 pocket knife, reasonably sharp (or substitute with scissors)
  - 3 pieces of bright cloth 2" wide x 36" long (tie to antenna or door handle)
  - Several packets of soup, hot chocolate, tea, bouillon cubes, etc. (mixed into melted snow to provide warmth and nutrition)
  - Plastic spoons
  - Packages of easy to eat, high energy foods like peanuts and candy or canned, ready-to-eat soups or fruit
  - 1 pair of socks and 1 pair of gloves or glove liners; cotton is not recommended because it provides no insulation when wet).
  - Extra clothing and a blanket or sleeping bag
  - 2 packages of book matches
  - 1 sun shield blanket or 2 large green or black plastic leaf bags (to reflect body heat)
  - 1 flash light and batteries (keep separate)
  - First aid kit
  - Toilet paper and sealable container for bathroom purposes
  - Fire extinguisher
  - Small tool kit
  - Ice scraper/snowbrush
  - Shovel
  - Sand or other traction aid
  - Tow rope or chain
  - Jumper cables
  - Road flares or warning lights
  - Gas line antifreeze
  - Large plastic garbage bag
  - Pencil stub and paper
  - Plastic whistle
  - Cellular phone with a charger
- You may want to keep the survival kit in the passenger compartment in case you go into a ditch and can't get to or open the trunk.

The recent warm temperatures and sunny skies have been nice – but we all know what's waiting for us just around the corner – Winter! The cold and snowy season is almost here and the question is – are you ready for it?

You should ... Get a Kit ... Make a Plan ... and Be Informed. Keep a high level of situational awareness by listening to the forecast every day. When snow, sleet, or freezing rain is in the forecast expect that it will impact your day to day routine, and be ready when it does!

### Mercer County Sheriff's Dept. Travel Advisories What they mean –

**Use caution advisory** – is issued by this office when visibility is reduced and driving conditions require that people reduce speed.

**No travel advised** – means that law enforcement and the highway department have determined that near zero visibility is occurring and/or that the driving surface of the road is blocked or covered with ice and driving is a deterrent

**Road closed no travel allowed** – (extreme conditions are present) is issued when roads are blocked and vehicles are stuck on the roadway. No travel will be allowed by any vehicle regardless of the situation. Barricades or officers will be blocking the roads leaving and entering the closed area. Drivers going around barricades will receive complaint and summons to district court. Schools, mines and power plants will be notified by phone.

All this information is given to the weather service and television and radio stations as it is occurring.

### Winter Weather Terminology

**Watch** is issued when the risk of a hazardous winter weather event has increased, but its occurrence, location, and/or timing is still uncertain.

**Warning or Advisory** is issued when a hazardous winter weather event is occurring, is imminent, or has a high probability of occurrence. A warning is used when there is a threat to life or property. An advisory is for less serious conditions that cause inconvenience, and, if caution is not used, could lead to situations that may threaten life or property.

**Snow criteria** for a warning is 6 inches or more in 12 hours or less, OR, 8 inches or more in 24 hours or less. Snow criteria for an advisory is 3 to 5 inches.

**Winter Storm Warnings and Winter Weather Advisories** may be issued for a combination of elements like snow coupled with wind and blowing snow, or snow coupled with sleet and freezing rain.

• **Sleet** is pellets of ice. Sleet bounces when it hits the ground.

• **Freezing Rain** is rain that freezes when it hits the ground or objects on the ground. It forms a sheet or glaze of ice.

• **Ice Storm** is used to describe occasions when the ice from freezing rain is significant enough (1/4 inch thick or more) to cause damage

• **Blizzard** is a storm with winds of 35 mph or higher AND visibility frequently below 1/4 mile in snow and/or blowing snow AND these conditions last three (3) hours or longer. There is no set temperature requirement for a blizzard.

**Wind Chill** is that part of the cooling of a human body caused by moving air. Moving air accelerates the rate of heat transfer away from a human body.

• **Wind Chill Advisory** is issued for wind chills of 25 to 39 below zero with a wind speed of at least 5 mph.

• **Wind Chill Warning** is issued for wind chills of 40 below zero and colder with a wind speed of at least 5 mph.

## White Christmas

BY JERICK TAFOYA

White Christmas is an all-time holiday classic film that is watched annually by millions around the world.

If you've never seen the movie before, here's a brief synopsis.

After World War II, Bob Wallace and Phil Davis are successful performers and producers. They eventually join forces with the sister act Betty and Judy Haynes to perform a Christmas show at an inn in rural Vermont. Once they arrive, they run into their old WWII command-

er, Major General Thomas G. Waverly - who happens to own the inn and is having financial difficulties. The quartet then does their best to put on a fun-filled musical to assist Waverly and his failing inn.

One of the scenes in the film includes Bob and Phil performing Judy and Betty's act. It's said that this scene however is completely improv.

In an attempt to stall for time, the male leads perform the same song sung by their female counterparts by lip-syncing. They are also dressed in the ladies' costumes.

This was not in the script at all. It was only a result of the actors just messing around on-set and the director saw them.

The film resonates with the entire family with its wholesome message and catchy and essential seasonal songs.

At the time, it was the highest-grossing musical. It was also the second-highest-grossing film of 1954 - only losing out to the war drama The Caine Mutiny. White Christmas grossed over \$12 million. In today's world, it would be over \$115 million.

*May health and happiness follow you and yours during the year to come!*

## ROOTS

**Sprout Bag**  
Add two tablespoons of sprouting seeds to a bowl or jar. Cover with cool water and let soak for 8 hours. Before the first use, turn your sprout bag inside out and place it in boiling water for 5 minutes. Let cool and invert the bag back to its original position.

Pour soaked seeds into the wet, prepared sprout bag. Pull the drawstring closed. Rinse with fresh water (or set in a bowl of cool water) for 60 seconds. If soaking in a bowl, massage the bag a bit to help prevent clumping and roots from growing into the sidewall.

Drain excess water from the bag before hanging it for 15 minutes, or until it stops dripping.

Place sprout bag in a bowl after the water has drained to protect it from drying out. Repeat the process of rinsing and draining your sprouts twice a day until the sprouts are fully mature.

If growing greens for the last two days, gently roll back the bag's collar to reveal the sprouts. Instead of dipping the bag to rinse it, water from the top using a sink sprayer.

The benefits of growing your sprouts are many:  
Freshness  
Year-round growing season  
Doesn't take up a lot of space  
It's portable  
There's a wide variety of

seeds to sprout. Be brave and experiment. Growing is quick. It's fun and a science experiment for the children.

My new favorites are pea shoots and sunflower seed sprouts. They are packed with flavor and larger than alfalfa sprouts.

On a final note, there are counter-top sprouting units of all sizes and shapes avail-

able on Amazon, or maybe even your local store.

As the sun shows its face for more extended periods, your body will begin to crave some green food and sprouting your seeds will get you into the upcoming spring season within a week.

Here's to a new New Year's resolution. Eat green.
